### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

In combination with all the limitations recited in the independent claim, the prior art of record does not anticipate nor render obvious connecting device engaged in a coupling bar which comprises a support and two metallic strips mounted in the support and in which a free engagement space is delimited between the metallic strips, said connecting device comprising a casing forming a housing provided with two input terminals for the connection of an electrical appliance of the circuit-breaker type, wherein two connecting lugs project out of the casing for mechanical and electrical link with the metallic strips after introduction of the two connecting lugs into the free engagement space, the electrical link is made from metallic parts joined respectively onto a face of one connecting lug and onto an opposite face of the other connecting lug, each connecting lug establishes the electrical link with the corresponding metallic strip, and the casing is also provided with two power-supply terminals integrating the electrical appliance into the power-supply circuit when a load or another appliance is connected to the power-supply terminals.

In combination with all the limitations recited in the independent claim, the prior art of record does not anticipate nor render obvious a power supply device engaged in a coupling bar which comprises two metallic strips mounted in a support and in which a free engagement space is delimited between the metallic strips, said power supply device comprising: an electrically insulating casing and two power supply wires, each of which is linked to a connecting lug, wherein said connecting lugs project out of the casing for mechanical and electrical link with the metallic strips after introduction of the connecting lugs into the free engagement space, the electrical link is made from metallic parts joined respectively onto a face of one connecting lug
